the nursery or visit us please telephone to make arrangements.*

***Spring 2008– Autumn 2008***

Cottage Memories is part of SENS Horticulture Ltd, company number 05005857

## Introduction

Welcome to our 2008 catalogue. As you will see, we have continued to extend our range of roses to include modern fragrant varieties and a celebration range. We grow many other modern roses not listed; however, please call us if there is a particular rose you are looking for, we may be able to help. We have still tried to concentrate on plants you would find in gardens of yester year. Most of our plants have been grown for their fragrance and reliability. As a growing nursery, we are not open to the public; however should you wish to collect your plants please call to make arrangements.

We look forward to seeing customers old and new at the following shows in 2008:

|   |                                 |

## Our Rose Collection

A brief description of rose types:

|                       |   |
|-----------------------|---|
| Alba (A)              | Foliage grey-green, excellent disease resistance. Scented. Flowers in early summer.           |
| Bourbon (B)           | Developed in Mid Victorian times. Popular for long flowering periods. Highly scented.         |
| Centifolia (C)        | Produce large flowers on long arching stems.  |
| China (CH)            | China roses, perpetual flowering on compact upright growth.                                   |
| Damask (D)            | Good sturdy growth and excellent disease resistance. All have distinct Damask perfume.        |
| Portland (P)          | All continuous flowering and richly fragrant.   |
| Gallica (G)           | Thrives in even poor soil, very healthy and usually scented. Most flower in mid Summer.       |
| Hybrid Perpetual (HP) | Forerunner of modern bush roses. Bear large richly scented successive blooms.                 |
| Moss (M)              | Richly scented with moss covered buds.  |
| Hybrid Musk (HM)      | Evolves in early 20 <sup>th</sup> Century. Healthy and free flowering. All have musk scent.   |
| Rugosa (R)            | Healthiest of all roses, leathery leaves, scented producing Autumn hips. Useful as hedging.   |
| Polyanthus (POLY)     | Compact, useful little rose producing flower clusters until late Autumn.                      |
| Teas (T)              | Highly scented, most need a warm spot, but are fully hardy.                                   |
| Noisette (N)          | Highly scented and free flowering.  |
| Rambler (RA)          | Vigorous, flexible stems make ideal covering plants. Many flower once but in great profusion. |
| Climber (CL)          | Varieties introduced in 20 <sup>th</sup> Century, mostly fragrant and repeat flowering.       |
